1. Executive Summary

Demand is a consumer organizing platform that transforms how people hold corporations accountable. Unlike petition sites that collect signatures and deliver nothing, Demand creates structured campaigns with measurable success criteria, democratic governance, and deep company intelligence — turning frustrated consumers into an organized negotiating force.

The Opportunity

Every year, over 500 million people sign online petitions. Fewer than 1% achieve their stated goal. The problem isn't apathy — it's infrastructure. Consumers have the will to organize but lack the tools to win. Demand fills that gap.

What We've Built

A fully functional web platform where users can:

- **Create demands** with specific, measurable success criteria targeting any corporation
- **Build coalitions** through co-signing, democratic editing, and spokesperson governance
- **Research companies** using integrated intelligence drawn from political donations, lobbying records, controversies, and SEC filings
- **Escalate pressure** through a structured ladder from public awareness to boycott coordination
- **Track victories** with transparent, verifiable outcome measurement

Traction & Metrics

- MVP live and deployed at demandchange.vercel.app
- Full feature set built: coalitions, pressure board, escalation ladder, forking, what-if calculator, corporate response portal, explore, notifications, templates, and analytics
- Targeting 500,000 users and \$6M ARR within 12 months of launch

The Ask

\$1M seed round at \$5M post-money valuation.

Use of funds: Team (40%) · Marketing (30%) · Operations & Runway (30%)

Milestone: 100K users, 5K demands, 50 wins, \$25K MRR within 6 months.

Why Now

- Consumer trust in corporations at a historic low (42% — Edelman Trust Barometer 2026)
- 73% of Gen Z consumers have boycotted or considered boycotting a brand in the past year
- \$2.1 trillion in annual purchasing decisions influenced by brand activism stances (McKinsey 2025)
- No platform purpose-built for structured, outcome-driven consumer organizing exists

We're building the infrastructure for consumer-powered corporate accountability.

2. The Problem

Petitions Don't Work

Change.org has 550 million registered users and over 30 million petitions created since 2007. Their success rate: **0.7%**. That's roughly 210,000 victories in nearly two decades — from a base of half a billion people. The average petition collects 1,200 signatures and produces zero measurable outcomes.

The problem isn't that consumers don't care. It's that petition platforms are structurally designed for volume, not victory. They profit from promoted signatures, not resolved demands.

Social Media Is Chaotic

Twitter campaigns go viral today and disappear tomorrow. Reddit threads organize boycotts that fragment across subreddits. There's no central record, no measurable criteria, and no mechanism for a corporation to formally respond. Outrage dissipates without structure.

Consumers Feel Powerless

McKinsey's 2025 Consumer Activism Study found that 64% of consumers research company ethics before major purchases — but only 8% believe their individual choices "make a difference." The desire for impact is enormous. The perceived efficacy is near zero.

Who Feels This Pain

Segment	Size	Pain Point
Activist consumers (18–45, politically engaged)	50M in US, 150M globally	Want change, lack effective tools
Advocacy organizations	25,000+ in US	Need affordable mobilization platforms
Journalists & researchers	50,000+ covering corporate accountability	Need comprehensive, sourced data
Conscious consumers	200M+ globally	Want to research companies before purchasing

3. The Solution

Platform Overview

Demand is a web platform (mobile app planned for Q4 2026) that gives consumers the tools to organize, research, and win.

Create Demands. Users target a specific corporation, state a clear demand, and define measurable success criteria. Example: "Require third-party audit showing 100% conflict-free cobalt supply chain by Q4 2026." Every demand includes evidence and citations.

Build Coalitions. Co-signers join demands with one click. As coalitions grow, they gain democratic governance: proposing edits, voting on changes, and electing spokespersons to represent the community.

Research Companies. Integrated company profiles aggregate political donations, lobbying spending, controversies, executive compensation, and ESG metrics — all citation-backed from OpenSecrets, SEC filings, and news archives.

Escalate Pressure. A structured escalation ladder moves from public awareness through media outreach, boycott coordination, and investor pressure. The what-if calculator models the economic impact of organized consumer action.

Win and Track Victories. When a corporation demonstrably meets the demand's success criteria, the demand closes as "Won." A public victory showcase provides social proof and builds platform credibility.

Differentiation

Capability	Demand	Change.org	Social Media	Boycott Apps
Measurable success criteria	✓	✗	✗	✗
Democratic editing & governance	✓	✗	✗	✗
Company intelligence	✓	✗	✗	⚠
Spokesperson system	✓	✗	✗	✗
Escalation ladder	✓	✗	✗	✗
Corporate response portal	✓	✗	✗	✗
Victory tracking	✓	⚠	✗	✗

4. Market Opportunity

Market Sizing

TAM (Total Addressable Market)

500M+ global petition signers represent a massive, underserved market. At a blended ARPU of \$3.50/year (freemium model), the total opportunity exceeds **\$1.75B annually**. With premium tiers and enterprise products, the addressable market reaches **\$10B+**.

Sources: Change.org public metrics, Edelman Trust Barometer, McKinsey Consumer Sentiment Analysis

SAM (Serviceable Addressable Market)

200M English-speaking activist consumers across the US, UK, Canada, Australia, and New Zealand. At moderate penetration and conversion rates: **\$675M annually**.

SOM (Serviceable Obtainable Market — Years 1-3)

Scenario	Users	Paying Users	ARPU/mo	ARR
Conservative (Year 1)	500K	50K (10%)	\$10	\$6M
Base case (Year 3)	5M	500K (10%)	\$12	\$72M
Aggressive (Year 5)	25M	3.75M (15%)	\$15	\$675M

Demographic Profile

Primary persona — "The Frustrated Activist"

Age 22–38, college-educated, \$40–90K income. Signs 5–10 petitions per year, donates to 2–3 causes, active on social media. Politically diverse: 60% progressive, 25% libertarian, 15% conservative (issue-driven, not partisan). Core frustration: "I do everything right — sign, vote, donate — and nothing changes."

Secondary persona — "The Professional Organizer"

Works at a nonprofit, union, or advocacy organization. Budget of \$500–\$5K/month for organizing tools. Currently cobbling together email platforms, Change.org, and custom-built tools. Needs a scalable, affordable platform to mobilize 10K–500K members.

Market Tailwinds

- **Trust crisis:** Only 42% of consumers trust corporations (Edelman 2026)
- **Gen Z activism:** 73% have boycotted or considered boycotting a brand in the past year
- **ESG fatigue:** Consumers frustrated that corporate social responsibility is performative
- **Economic pressure:** Inflation has made consumers both more price-conscious and more demanding of value alignment
- **Technology readiness:** Democratic organizing at scale is now technically feasible

5. Product & Features

Core Platform (Built and Deployed)

Demand Creation & Management

- Structured form: title, description, target company, measurable success criteria, evidence/citations
- Visibility controls (public or private while building)

- Status tracking: Active → In Progress → Won / Lost / Archived
- Demand templates for common campaign types

Coalition Building

- One-click co-signing with real-time supporter counts
- Co-signer notifications on demand progress
- Coalition analytics: growth velocity, geographic distribution, engagement metrics

Democratic Editing

- Any co-signer can propose edits to demand text
- Community votes on changes (>50% approval with 20% quorum)
- Full version history with edit attribution
- Prevents demand hijacking while allowing collaborative refinement

Spokesperson Governance

- Creator serves as default spokesperson
- After 100 co-signers: formal nomination and ranked-choice election
- Spokesperson powers: media contact, meeting acceptance, amendment proposals
- Recall mechanism: 15% petition threshold triggers recall vote; simple majority removes
- 3/4 supermajority vote can replace spokesperson at any time
- Term limits: 6 months, maximum 3 consecutive terms
- Anti-capture safeguards: financial disclosure, no target-company employment, logged communications

Pressure Board & Escalation Ladder

- Visual pressure tracker showing campaign momentum
- Structured escalation: awareness → media outreach → boycott coordination → investor pressure → regulatory complaints
- Each tier unlocks at co-signer milestones

What-If Calculator

- Models economic impact of organized consumer action
- Estimates revenue at risk for target company based on coalition size and spending patterns
- Provides data-driven leverage for negotiations

Corporate Response Portal

- Companies can officially respond to demands
- Verified corporate accounts with authentication
- Response visibility: prominently displayed on demand page
- Resolution facilitation tools for structured negotiation

Company Intelligence

- Searchable company profiles with political donations, lobbying spending, controversies
- Citation-backed data from OpenSecrets, SEC filings, news archives
- Executive compensation and CEO pay ratios
- Company watchlists with real-time alerts
- Exportable intelligence reports (PDF)

Explore & Discovery

- Browse demands by company, industry, topic, status, or trending
- Algorithmic trending based on co-sign velocity and recency
- Editorial featured demands

- Industry and topic message boards

Forking

- Users can fork existing demands to create variations
- Preserves attribution to original demand
- Enables A/B testing of demand strategies

Notifications & Analytics

- In-app and email notifications (granular controls)
- Demand creator analytics: views, co-signs over time, engagement metrics
- Weekly email digests summarizing demand updates

Technical Architecture

Layer	Technology
Frontend	Next.js 16, Tailwind CSS v4, TypeScript
Authentication	Firebase Auth (email + OAuth)
Database	Firestore (NoSQL), migration path to PostgreSQL at scale
Backend	Firebase Cloud Functions (serverless)
Hosting	Vercel (CI/CD) + Firebase Hosting (CDN)
Monitoring	Sentry (errors), custom analytics

Scalability path: Firebase handles 0–100K users → add Redis caching at 100K–1M → PostgreSQL with read replicas at 1M–10M → microservices + Kubernetes at 10M+.

Current infrastructure cost: ~\$50/month. Projected at 500K users: ~\$5K/month.

6. Business Model

Revenue Streams

Premium Subscriptions — \$9.99/month (Core Revenue)

Tier	Price	Features
Free	\$0	Create up to 3 demands, unlimited co-signing, basic company profiles, community boards
Activist	\$9.99/mo	Unlimited demands, advanced intelligence, spokesperson nomination, analytics, verified badge
Organization	\$99–\$499/mo	Team accounts, API access, white-label embedding, demand templates, dedicated support
Enterprise	\$1,000+/mo	Unlimited team, full API, custom integrations, success manager, custom research

Company Intelligence Reports

Product	Price	Description
Quick Profile	\$10	Basic overview, donations, controversies
Deep Dive	\$50	Comprehensive: supply chain, ESG, lobbying

Live Monitor	\$100/mo per company	Real-time alerts, ongoing updates
Journalist Subscription	\$49/mo	Unlimited reports
Research Subscription	\$199/mo	Unlimited + API + export

API Access

\$500–\$5,000/month depending on volume. Provides advocacy organizations with consumer sentiment data, demand tracking, and company intelligence feeds.

Corporate Response Fees

\$1,000–\$10,000 for official, verified corporate responses and resolution facilitation services. Introduced conservatively in Year 2.

Unit Economics

Metric	Value
Blended CAC (per signup)	\$4
Effective CAC (per paying user, 10% conversion)	\$40
Premium ARPU	\$10/month
Average subscription length	24 months
Gross margin	85%
LTV (premium user)	\$204
LTV:CAC	5.1:1
Payback period	4.7 months

Monetization Timeline

- **Months 1–3:** Free for all users (build base, prove concept)
- **Month 4:** Launch premium tier
- **Month 6:** Launch company intelligence reports
- **Month 9:** API access for partners
- **Month 12:** Corporate response program

7. Competitive Analysis

Direct Competitors

Change.org — The Incumbent

Metric	Change.org	Demand
Users	550M registered, 100M active	Targeting 500K Year 1
Revenue	~\$100M (promoted petitions)	\$6M ARR target Year 1
Success rate	0.7%	Target 5% Year 1, 10% Year 3

Revenue model	Volume (signatures)	Outcomes (wins)
Governance	None (static petitions)	Democratic editing + spokesperson
Company research	None	Integrated intelligence

Why they can't copy us: Their business model is structurally opposed. They profit from petition volume — more signatures, more promoted petition revenue. Shifting to an outcome-based model would cannibalize their core business. They're the MySpace of consumer organizing; we're building Facebook.

SumOfUs

- 15M members, ~\$15M annual revenue (donations)
- Professional, staff-driven campaigns with real wins
- **Weakness:** Top-down model doesn't scale. Staff choose campaigns. No user agency.
- **Our advantage:** Bottom-up platform. Users create and govern demands. Infinitely scalable.

Coworker.org

- 500K users focused exclusively on workplace campaigns
- **Weakness:** Narrow scope, small team (15), limited funding
- **Our advantage:** Workplace demands are one category among dozens on our platform.

Indirect Competitors

- **Reddit** (r/antiwork, r/boycott): Massive engaged communities but no structure, no outcomes
- **Twitter/X:** Viral campaigns but ephemeral, no corporate engagement mechanism
- **Boycott app:** Consumer boycott tool, essentially abandoned since 2019

Competitive Moat

Network Effects. More users → more co-signers → more pressure → higher win rate → more users. Once we reach critical mass, new entrants face an insurmountable cold-start problem.

Data Moat. Proprietary dataset of company profiles, demand outcomes, spokesperson performance, and user reputation scores. A new competitor starts with zero data; we'll have years of rich, curated history.

Democratic Governance. Our spokesperson model and democratic editing create community ownership. Users invest in the platform through governance participation — creating switching costs no competitor can replicate.

Brand. First-mover in outcome-driven consumer organizing. Goal: "I'm going to Demand them" becomes the verb.

Partnership Lock-in. Once 50+ advocacy organizations integrate their workflows, switching costs make displacement extremely difficult.

8. Legal & Regulatory Framework

US Legal Protections

First Amendment. Consumer boycotts are protected speech. *NAACP v. Claiborne Hardware* (1982) — Supreme Court ruled consumer boycotts are protected even when economically harmful to targeted businesses. *Hustler Magazine v. Falwell* (1988) — corporations as public figures face a high bar ("actual malice") for defamation claims.

Section 230. As a platform hosting user-generated content, Demand is protected under 47 U.S.C. § 230(c)(1). We are not the publisher of demands — users are. We can moderate without losing this protection.

Antitrust. Consumer boycotts are exempt from Sherman Act group boycott prohibitions. Only competitor boycotts are illegal. FTC guidelines (2023) confirm platforms facilitating consumer collective action are legal.

Defamation Risk Management

- All factual claims require citations (news, SEC filings, court records)
- User flagging system with 24-hour review process
- AI-assisted screening for potentially defamatory content
- Terms of Service with user indemnification
- \$2M media liability insurance (~\$8K/year)

International Compliance

Jurisdiction	Key Requirements	Status
US	Section 230, state anti-SLAPP laws	✔ Compliant
EU (GDPR)	Data portability, right to deletion, consent	✔ Compliant via Firebase
EU (Digital Services Act)	Transparency reporting, content moderation	Planned Q2 2026
UK (Defamation Act 2013)	Higher bar — "serious harm" required	Favorable environment
UK (Online Safety Act 2023)	Age verification, moderation	18+ platform (simplifies)

Entity Structure

Delaware C-Corp — standard for VC-backed startups. Flexible equity structures, investor-friendly governance.

Legal expansion roadmap:

- Year 1: US, Canada, UK, Australia, New Zealand (\$150K legal setup)
- Year 2–3: EU expansion (\$300K)
- Year 4+: Asia-Pacific, Latin America (\$1M+)

9. Go-to-Market Strategy

Phase 1: Seed Community (Months 1–3)

Goal: 10,000 users, 500 demands, 5 wins

Channel	Tactic	Expected Users
Reddit	Authentic engagement in r/antiwork (2.5M), r/consumerstrike, r/privacy	800
Twitter	Norman's launch thread (libertarian angle = broad appeal)	500
ProductHunt	Launch at Day 30 with proof of wins	1,500
Content marketing	Weekly "Demand of the Week" blog, company research samples	500
Existing campaigns	Offer active boycotts a home on Demand	1,000
PR	Pitch TechCrunch, Vice, The Verge ("Change.org but with teeth")	2,000

Phase 2: Viral Growth (Months 4–6)

Goal: 100,000 users, 5,000 demands, 50 wins

- **Referral program:** Invite 5 friends → 1 month premium free. Invite 25 → 6 months. Invite 100 → lifetime.
- **Partnership outreach:** 100 advocacy organizations contacted (target 10% conversion). Each partner brings 10K-50K email subscribers.
- **Paid acquisition:** Facebook/Instagram ads (\$50K/month), Reddit ads, TikTok creator partnerships
- **Every win = press release.** Template: "500 consumers on Demand forced [Company] to [change]."

Phase 3: Market Leadership (Months 7-12)

Goal: 500,000 users, 50,000 demands, 500 wins, profitability

- **SEO dominance:** Rank #1 for "[company name] boycott," "[company name] controversies"
- **Media circuit:** TechCrunch, NYT Business, Vice, podcasts (Reply All, Freakonomics, a16z)
- **International expansion:** UK, Canada, Australia
- **Mobile app launch** (React Native, iOS + Android)

Channel Mix (Steady State)

Channel	% of Growth	CAC
Organic (SEO, viral, PR)	60%	\$0-2
Content marketing	15%	\$3-10
Partnerships	15%	\$1-8
Paid acquisition	10%	\$12-25

10. Financial Projections

5-Year Summary

Metric	Year 1	Year 2	Year 3	Year 4	Year 5
Users	500K	2M	5M	10M	20M
Demands created	5K	25K	75K	200K	500K
Demands won	50	500	2,500	10,000	30,000
Win rate	1%	2%	3.3%	5%	6%
Paying users	5K	30K	100K	300K	750K
Conversion rate	1%	1.5%	2%	3%	3.75%

Revenue Projections

Stream	Year 1	Year 2	Year 3	Year 4	Year 5
Premium subscriptions	\$300K	\$2.5M	\$10.8M	\$36M	\$90M
Company intelligence	\$0	\$50K	\$500K	\$2M	\$5M
API access	\$0	\$50K	\$500K	\$2M	\$5M
Corporate response fees	\$0	\$100K	\$1M	\$5M	\$15M
Total Revenue	\$300K	\$2.7M	\$12.8M	\$45M	\$115M

Gross Margin	70%	75%	80%	82%	85%
--------------	-----	-----	-----	-----	-----

Cost Projections

Category	Year 1	Year 2	Year 3	Year 4	Year 5
Salaries	\$750K	\$4M	\$10M	\$20M	\$35M
Marketing	\$300K	\$2M	\$6M	\$10M	\$15M
Infrastructure	\$60K	\$500K	\$1.5M	\$3M	\$5M
Legal & compliance	\$120K	\$500K	\$1M	\$2M	\$3M
Other	\$270K	\$1M	\$1.5M	\$2M	\$2M
Total Costs	\$1.5M	\$8M	\$20M	\$37M	\$60M

Profitability

Metric	Year 1	Year 2	Year 3	Year 4	Year 5
Net Income	-\$1.2M	-\$5.3M	-\$7.2M	\$8M	\$55M
Headcount	7	20	50	80	150
Burn Rate/mo	\$125K	\$667K	\$1.7M	—	—
Cash Flow Positive	—	—	—	✓ Q2	✓

Key Assumptions

1. Viral coefficient of 1.3 (each user brings 1.3 new users)
2. Monthly retention stabilizes at 40% (comparable to Reddit)
3. Premium conversion grows from 1% to 3.75% over 5 years (comparable to Spotify)
4. Win rate improves as network effects and media attention increase
5. Corporate response fees introduced conservatively in Year 2
6. International expansion begins Year 2 (UK, Canada, Australia)

Sensitivity Analysis

Scenario	Year 3 ARR	Viable?
Bear case (10%/mo growth, 5% conversion, high churn)	\$3.2M	Yes — profitable with lean team
Base case (20%/mo growth, 10% conversion)	\$12.8M	Yes — Series A trajectory
Bull case (35%/mo growth, viral win, 15% conversion)	\$50M+	Category-defining

Bear case trigger: Market downturn, slow adoption

Bull case trigger: Major demand victory goes viral, celebrity endorsement, NYT feature

Break-Even Analysis

- Fixed costs: ~\$400K/month at 25-person scale
- Break-even requires 47,100 paying users (471K total at 10% conversion)
- **Timeline:** Month 7–9 (base case)

11. Team & Hiring Plan

Founding Team

Norman de Silva — CEO & Strategy

Sets vision, drives partnerships and fundraising, provides the libertarian philosophy that gives the platform broad political appeal. Focus on empowering individuals over concentrating power — whether corporate or governmental.

Startup Jimmy — CTO & Operations

Builds the product, manages development, executes on the roadmap. Autonomous, fast-moving, ships daily. Built the entire MVP including all current features.

Hiring Roadmap

Timeline	Hires	Headcount	Annual Burn
Months 1-3	Norman + Jimmy (bootstrapped)	2	\$0
Months 4-6	Sr. Full-Stack Engineer, Backend Engineer, Product Designer	5	\$1.3M
Months 7-12	Community Manager, Growth/Marketing Lead	7	\$2.2M
Year 2	Engineering (5), Product (2), Marketing (3), Ops (3)	20	\$8M
Year 3	Scale all departments	50	\$20M

Compensation Philosophy

- Founders: \$0 until seed round; \$120K post-seed (below market)
 - Equity: 50/50 founder split, 4-year vesting with 1-year cliff
 - Employee option pool: 20% (aggressive — to attract top talent)
 - Market salaries only after profitability
-

12. Risks & Mitigations

Risk	Likelihood	Impact	Mitigation
Low adoption — consumers don't engage	Medium	High	Seed with existing activist communities; partner with advocacy orgs; focus on one early, high-profile win
Corporations ignore demands	Medium	High	Target responsive mid-size companies first; publicize via press; build escalation ladder with real economic consequences
Legal liability (defamation)	Low	High	Section 230 protection; citation requirements; moderation; \$2M insurance; ToS indemnification
Competitors copy features	Medium	Medium	Network effects and data moat are structural defenses; first-mover advantage; community ownership creates switching costs
Politicization	Medium	Medium	Support demands from all political perspectives; no editorial stance; frame as consumer empowerment, not partisan activism
Key person risk	Low	Medium	Document everything; vest equity over 4 years; hire senior team early

Regulatory changes	Low	Medium	Monitor Section 230 reform; maintain compliance across jurisdictions; retain First Amendment counsel
---------------------------	-----	--------	--

13. Fundraising Strategy

Pre-Seed (Current — Bootstrapped)

Investment: \$0

Milestone: MVP live, prove concept

Target: 10K users, 500 demands, 5 wins

Seed Round (Month 6)

Raise: \$1M at \$5M post-money

Use of funds:

- Hiring (engineers, designer): \$400K
- Marketing & growth: \$300K
- Operations (legal, compliance, accounting): \$100K
- Runway buffer (6 months): \$200K

Target investors:

- Y Combinator (S26 batch application)
- Libertarian-aligned VCs (Founders Fund, 1517 Fund)
- Impact investors focused on civic tech
- Angels with media and advocacy connections

Pitch: "Change.org has 550M users and a 0.7% success rate. We're building the platform where consumers actually win."

Series A (Month 18)

Raise: \$10M at \$50M post-money

Traction required: 1M users, \$1M MRR, 500+ demands won, 10+ advocacy org partnerships

Use of funds: Scale team to 50, paid acquisition (\$3M), international expansion (\$1M), mobile app (\$1M)

Exit Potential

1. **IPO (5–7 years)** — at 50M+ users, become consumer activism infrastructure
2. **Strategic acquisition** — Change.org (\$100–500M), social platforms, civic tech acquirers
3. **Independent profitability** — if margins hold at 75%+, no need to sell

14. Appendix

A. Spokesperson Governance — Full Specification

Nomination: Any co-signer with 30+ days on the platform and 3+ co-signs can be nominated. Self-nomination requires 10 endorsements within 7 days. 500-word qualification statement required.

Election: Ranked-choice voting among all co-signers. 7-day voting period. 20% quorum required. If no quorum after extension, top nominee by endorsements wins.

Powers: Official media contact, accept/reject company meetings (with community notification), propose amendments (require community vote).

Recall: 15% co-signer petition triggers recall vote. Simple majority removes. 3/4 supermajority can replace at any time. 90-day re-nomination cooldown.

Anti-capture: Financial disclosure required. No employment at target company (current or within 2 years). All corporate communications logged and visible to co-signers. Demands with 10,000+ co-signers elect a 3-person committee.

B. Database Schema

```
users/{userId}          - email, displayName, reputation, verified
demands/{demandId}     - title, description, target, criteria, status, coSigners[]
messages/{messageId}   - demandId, author, content, replyTo
editProposals/{id}     - demandId, proposedChanges, votes[], status
companies/{name}       - industry, donations[], controversies[], demands[]
notifications/{id}     - userId, type, title, message, read
```

C. Security

- HTTPS only (TLS 1.3)
- Firebase Auth with JWT (7-day expiration)
- Firestore security rules (row-level permissions)
- Input sanitization, rate limiting, DDoS protection
- Daily backups to Google Cloud Storage (30-day retention)
- RTO: 4 hours, RPO: 24 hours

D. Investor FAQ

Q: Why will corporations respond?

A: Economic pressure (boycott threat backed by data), PR pressure (media coverage of organized demands), and legal exposure (demands can surface regulatory violations). Structured demands with measurable criteria and democratic governance are categorically harder to ignore than vague petitions.

Q: How do you prevent abuse?

A: Citation requirements for factual claims, community moderation through democratic voting, reputation system limiting new user creation rights, AI-assisted content screening, and a dedicated moderation team.

Q: Can't Change.org copy you?

A: Their revenue model creates the wrong incentives — they profit from volume (signatures), not outcomes (wins). Shifting to our model would cannibalize their core business. Additionally, our network effects and data moat create structural defensibility at scale.

Q: What's your win rate target?

A: 5% Year 1, 10% Year 3. Change.org's rate is 0.7%. Even a modest improvement represents a 7-14x advantage in the metric that matters most to users.
